**FUEL CELL ENERGY MANAGEMENT SYSTEM FOR COLD ENVIRONMENTS**

Examiner: Yuan

S.N. 10/791,428

Art Unit: 1745

April 18, 2007

**Detailed Action**

1. The Applicant's preliminary amendment filed March 2, 2004 was received. Claims 1-22 were canceled and claims 23-46 were added. However, it is noted that claims 1-23 were presented in the originally filed application. The Office Action is then addressed the added claims 23-46.

***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 23-34, drawn to an energy management system for controlling the temperature of a fuel cell system, classified in class 429, subclass 34.
  - II. Claims 35-46, drawn to a method of controlling the temperature of a fuel cell system, classified in class 429, subclass 13.

The inventions are distinct, each from the other because of the following reason:

3. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). As admitted in the subject matter, the energy management system as claimed can be practiced by a different process, in which the use of a hydrogen supply valve is not required.

Art Unit: 1745

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
